ABOUT ME

After my first contact with SwiftUI, I realised the professional path I wanted to follow. My main goal is to develop the best apps while combining both my design and programming skills. One of my dreams is to become a great name in the Front-End development world. Now that I'm starting my career, I would like to join a great team where I can further develop my skills.

WORK EXPERIENCE

MULTI-PLATAFORM DEVELOPMENT Remote

Freelancer

Sep 2022 - Present

While finding a team to join and grow, I'm exploring the world of development. I did a Flutter project, now I'm building an app using SwiftUI.

INTERSHIP Soure

Laser Print

Feb 2019 - Jul 2019

I had two jobs. As a graphic designer I did posters, a web design and development, gifts design, clothes and brand design and stuff like that. I also had to do some manufacturing work such as stamping clothes, printing posters and very types of gifts made of wood and acrylic.

EDUCATION

UNDERGRADUATE

Coimbra Engineering School, Coimbra

Due to bureaucracies, I'm stuck this year with only one 3 ECTS subject, French II, a subject non related with Computer Science, but is included for being an European course. I did all other subjects of the first and second year, where I improved my programming skills, learn some design patterns, etc.

2019

HIGH SCHOOL DIPLOMA

ESMA, Soure

I took a course that covered many subjects, such as programming, web development, app development, graphic design, web design, video making, movie scripts, video effects, sound effects and other fields. It gave me experience to work with design tools and gave me the appetite to go deep in programming development.
